Education Council Meeting Packet

Tuesday, October 18, 2005
212 Knott Building
2:15 – 3:45 PM

Allan G. Bense
Speaker

Dennis K. Baxley
Council Chair

FLORIDA HOUSE OF REPRESENTATIVES

Allan G. Bense, Speaker

Education Council

Dennis Baxley
Chair

Ralph Arza
Vice Chair

Meeting Agenda
Tuesday, October 18, 2005
212 Knott Building
2:15 – 3:45 PM

I. Opening Remarks by Chair Baxley

II. Roll Call

III. Presentations:

Florida's K20 Education Data Warehouse: A Unique Asset for Decision Makers at all Levels

Hanna Skandera, Deputy Commissioner, Accountability, Research, and Measurement, Florida Department of Education

Sunshine Connections

Dr. Theresa Klebacha, Director of Strategic Initiatives, Florida Department of Education

Jane Broom, Partners in Learning Program Manager, Microsoft

Michelle Gainer, High School Math Teacher, Mosley High School, Bay County

Patty McQueen, Ortega Elementary School, Duval County

Susan Phillips, Stockton Elementary School, Duval County

IV. Closing Comments / Meeting Adjourned

FL K20 ED Warehouse

Florida's K20 Education Data Warehouse: A Unique Asset for Decision Makers at all Levels

House Education Council Meeting

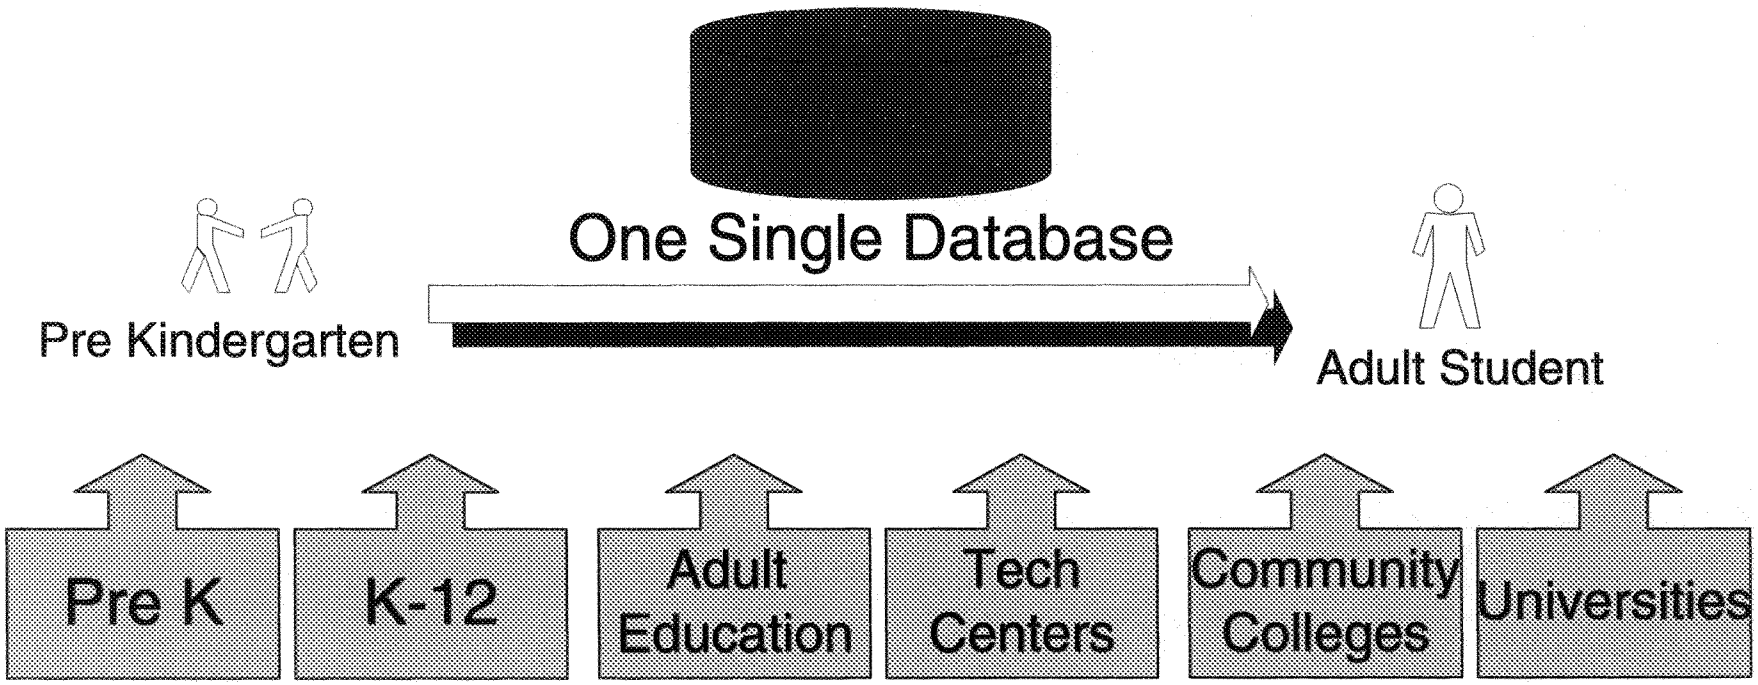
October 18, 2005

Hanna Skandera
Deputy Commissioner
Accountability, Research, & Measurement
FLDOE

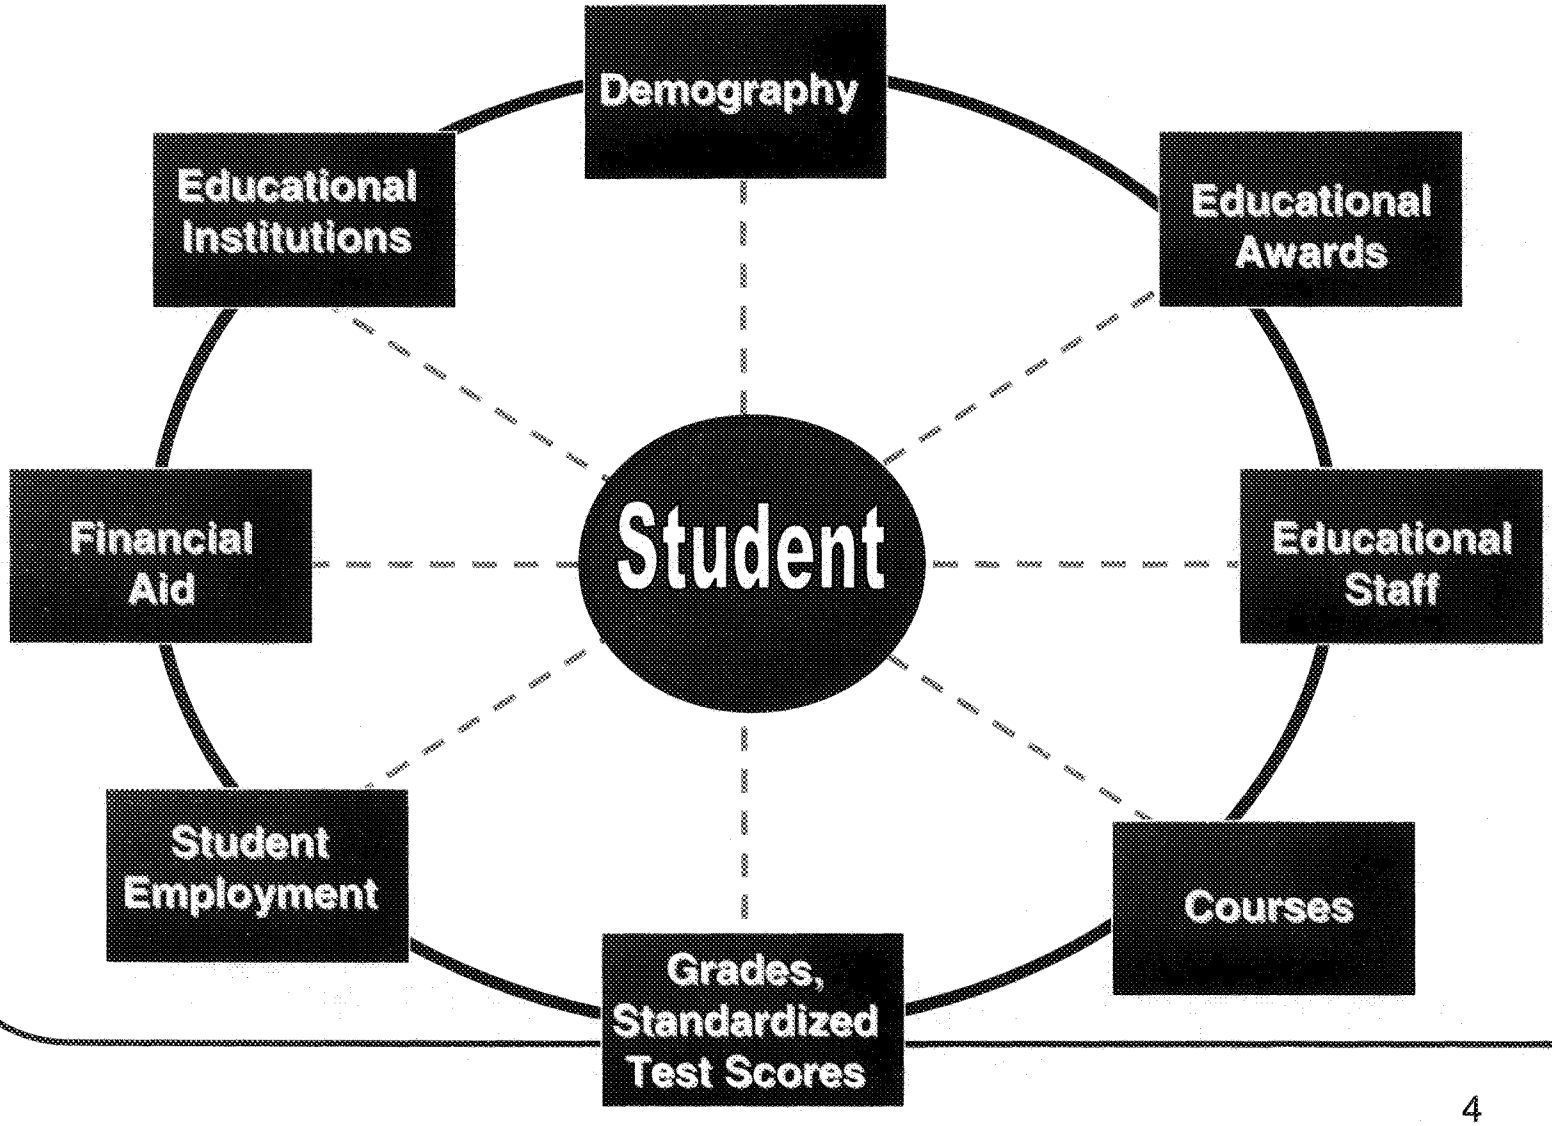
K20 Education Data Warehouse: An Overview

- What is it?
- What does it do?
- What are the benefits?
- Questions?

K20 Education Data Warehouse:
A Single Repository for all Education Data Resources



K20 Education Data Warehouse: Focuses all Data Resources Around Students



K20 Education Data Warehouse:
Florida Public Education Data from 1995 to 2005

Nearly 1000 computer programs link data resources over time and across education sectors connecting data regarding:

- 10,329,264 K20 Students
- 993,966 Staff
- 16,702 Institutions
- 276,196,852 Student Enrollments

K20 Education Data Warehouse: Streamlines Access to Data Resources

Before:

- Data requests over time & across education sectors were complex:
  - Format Differences
  - Data Element Differences
  - Archival & Live Data
  - Programming
  - Editing
  - Report Writing

After:

- Data requests over time & across education sectors are routine:
  - Common Formats
  - Common Definitions
  - No Archives
  - All Data Readily Accessible
  - Programming Simplified
  - Editing Simplified
  - Data Access via Simplified Custom Reports

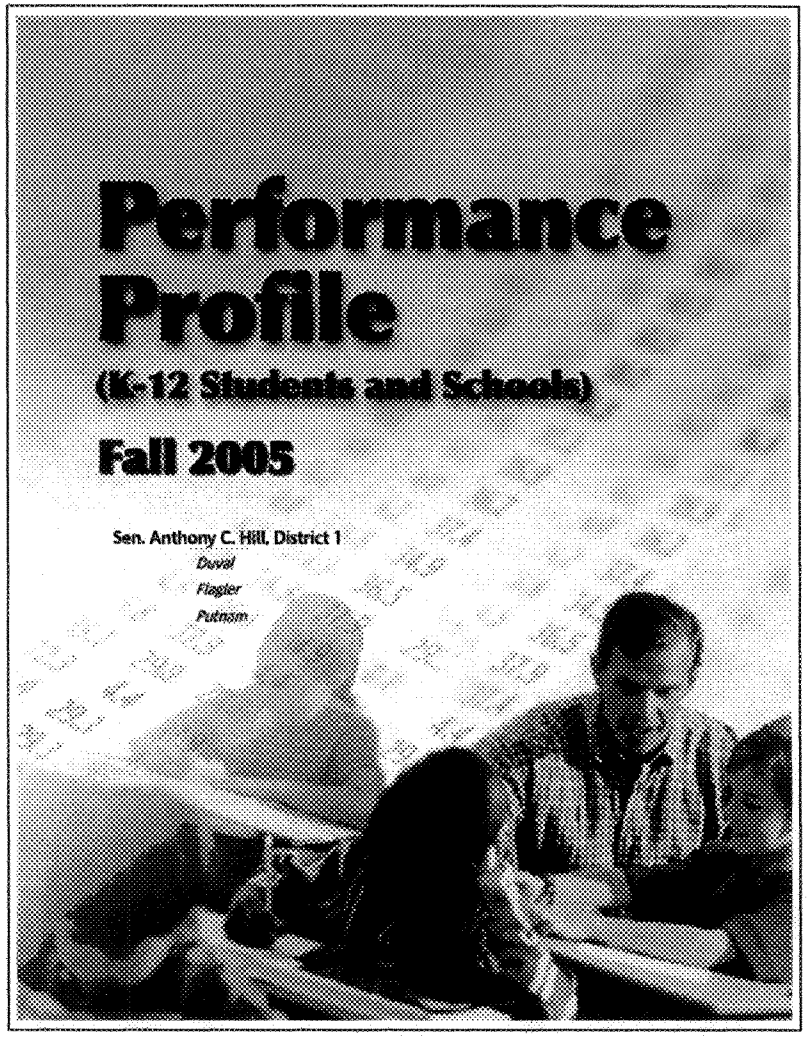
K20 Education Data Warehouse: Savings on Time and Effort = Dollar Savings

- Faster Access to Florida's Education Data Resources
- More Flexible Access and Use of Data
- More Data System Consistency, Accuracy, and Timeliness across Education Sectors
- Reduced Manpower Required to Access Data and Report Results

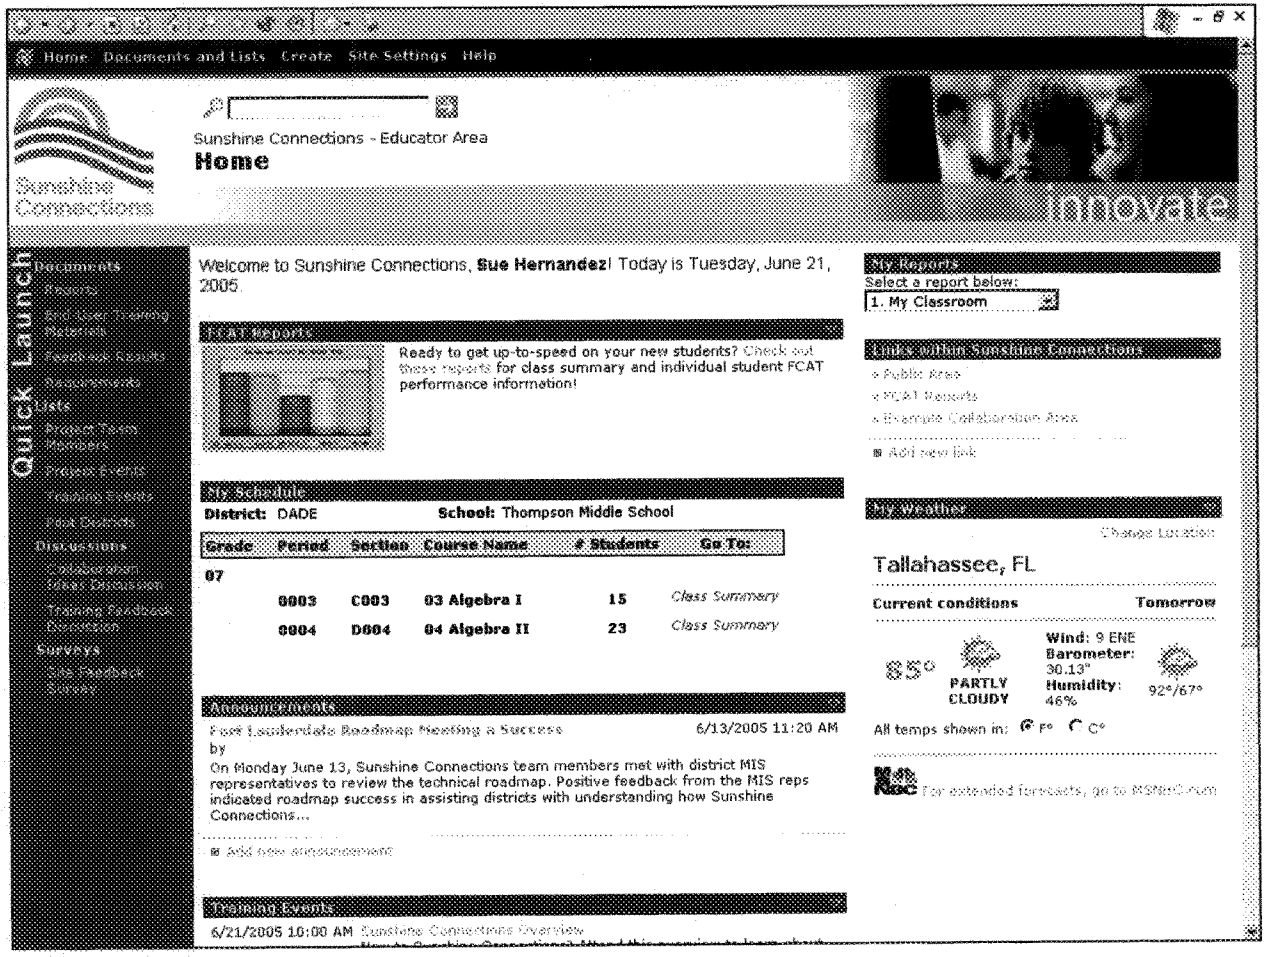
K20 Education Data Warehouse: Better Data, Improved Access = Better Decisions

- Used to Inform and Develop Education Policy
- Used in Strategic Planning
- Used in Public Reporting

K20 Education Data Warehouse:
New Ways of Providing Information to Decision Makers



K20 Education Data Warehouse: New Ways of Providing Information to Decision Makers - Sunshine Connections



Sunshine Connections

Sunshine Connections

House Education Council Meeting

Presented by Dr. Theresa Klebacha
Director of Strategic Initiatives, FLDOE

October 18, 2005
Tallahassee, FL

Sponsored through partnership of the Florida Department of Education and Microsoft

Sunshine Connections

Overview

- The vision
- The outcomes and benefits
- The project
- The "costs"
- The partner opportunities

Sunshine Connections

Project Vision

- Florida is focused on **highest performance and achievement** for all students.
- Classroom **teachers** make the difference.
- Florida leads the nation in **data-driven** systems and decision-making policy.
- Microsoft is making a **business investment.**

Sunshine Connections

Project Outcomes & Benefits

- Benefits to Florida teachers and educators
  - Integrated and "real-time" student data and teacher resources
  - Reduced time on paperwork to provide more time for instruction
  - Expanded conversations beyond classroom
  - Supplement existing district functionality and/or provide basic functionality where it doesn't currently exist
- Benefits to Florida Department of Education
  - Tangible technology solutions for Florida educators
  - Direct conversations with local educators
- Benefits to Microsoft
  - Replicable breakthrough approaches to education
  - Industry leadership

Sunshine Connections

Project Background

- 5-year **contract** (through August 31, 2009)
- **Iterative process** driven by users (the teachers and school site people who make a difference in the classroom.)
- **Focus groups** and Statewide Advisory Council
- Starting with **teachers** then expanding to principals, administrators, parents, etc.

Sunshine Connections

Pilot Districts/College

- **Bay County** School District
- **Dade County** School District
- **Duval County** School District
- School District members of NEFEC
  - **Baker, Bradford, Columbia, Dixie, Flagler, Gilchrist, Lafayette, Levy, Nassau, Putnam, Suwannee, Union**
- **Indian River Community College**

Sunshine Connections

What IS Sunshine Connections

A portal & integration environment to:

- Integrate/Improve the use of **state- & local-level education data**;
- Provide an **environment for teachers** at the classroom level, principals at the school level, administrative staff at the district level, etc.;
- Provide a state-wide **repository of education resources**;
- Improve **collaboration** among education professionals throughout the state; and
- **Share & exchange** education information & resources more **effectively and efficiently**.

Sunshine Connections

What ISN'T Sunshine Connections?

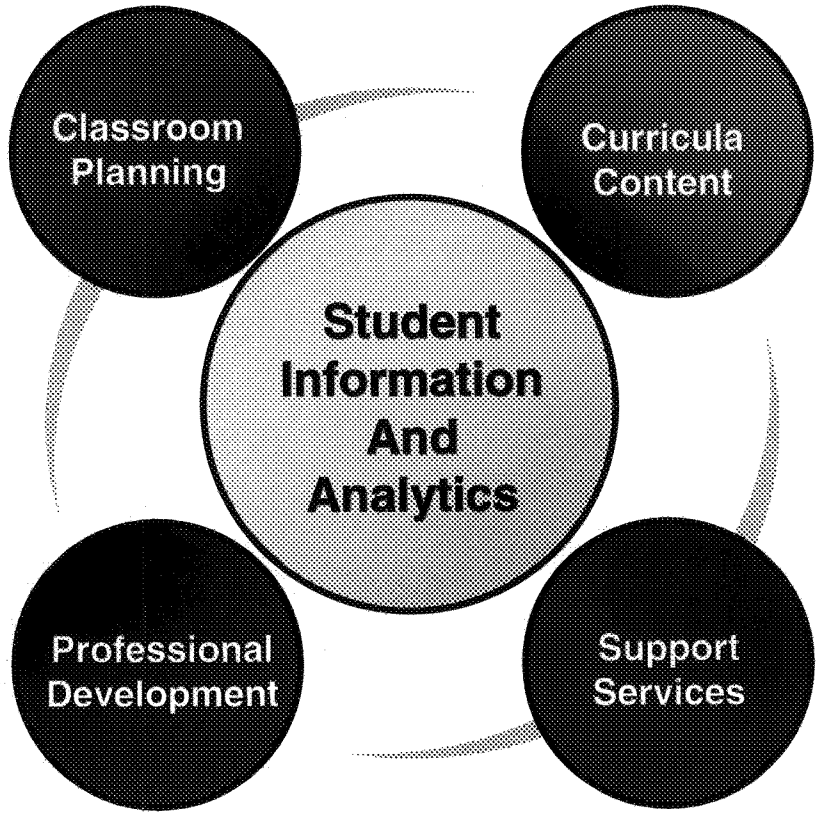
Sunshine Connections is not:

- A state-wide Student Information System;
- A centralized business management system (HR, Finance, Facilities, etc.); or
- A state-wide network infrastructure.

Sunshine Connections

Sunshine Connections: Five Functional Areas

Revolving around student performance and performance needs



Sunshine Connections

Current Functionality Targets

Q1	Q2	Q3	Q4	Q5	Q6	Q7
July-Sept 2005	Oct-Dec 2005	Jan-March 2006	April-June 2006	July-Sept 2006	Oct-Dec 2006	Jan-March 2007
• 2005-06 Back-to-School release (R1): Class Rosters matched to 2005 FCAT results • Class and student-level statistics to the strand level • Single site for web tools & references • Restricted access process • DOE IEP content & automation review • Back to School Calendars	• Refine R1 based on evaluation & feedback • Business Intelligence production of legislative profiles • Reading content links • Research & Assessment of learning & content management tools • IEP requirements & code review • MyPoints.org review • Statewide review of teaching tools	• Propose standards & requirements for digital content • 2006 FCAT tools & materials	• 2005-06 FCAT scores release with analytic tools, reports • Student remediation strategies linked to Sunshine State Standards • Link teachers & students to remediation resources • Choice options • Analysis & integration of classroom planning • Individual Professional Development Planning templates • Guide to interpret longitudinal FCAT	• 2006-07 Back-to-School release: longitudinal FCAT data, analytic tools • AYP and School Grades • 2007-08 Legislative Budget • Automate IEP & AIP • School Improvement Plan templates • Analysis & Integration of Grade Book tools • Guides to FCAT performance trajectories	• FCAT performance trajectories released & related to content areas, classroom planning • Analysis & integration of mini-assessments • Move legislative profiles to Business Intelligence environment • FACTS.org into SC	• New Governor takes office • Postsecondary Planning tools

- Statewide conferences, association meetings, regional meetings
- Strategic planning and progress reporting

Sunshine Connections

Florida's Contributions

- The Department of Education will:
  - Provide working space, network connectivity, and telecommunications facilities for Microsoft staff
  - Commit sufficient staff resources and expertise on statewide educational data systems, access, network connectivity and project management
  - Provide logistics and arrange travel for groups of district experts
  - Make data systems and repositories available
  - Collaborate in public relations strategy
- Contract:
  - "The only cost to the Department and the State is reflected in the assignment of staff and resources to this project as no payment will be made to any vendor under this contract during the five year duration of the project."

Sunshine Connections

District Partner Contributions

- Local Education Agencies (LEAs) will:
  - Provide working space, network connectivity, and telecommunications facilities for project staff;
  - Provide expertise on local data system, data access and network connectivity;
  - Provide access to data system and data repositories as necessary; and
  - Designate and facilitate the participation of a local users advisory committee.
- Contract:
  - "No changes or redesigns of state databases or data feeds from local education agencies to the state."

Sunshine Connections

Microsoft's Contributions

- This is a no fee contract for the State of Florida.
  - "There will be no fee to the Department for hosting, administration, hardware or software through the project performance period, including upgrades."
- Microsoft will provide and pay for:
  - Staff, licenses, development and hosting throughout the five year project.
  - Service level agreements, server hardware resources, and system management.
  - Perpetual licenses for all software products that Microsoft has provided under the contract.
  - Administrator functions supported by the data host.
  - Developers for implementation.

Sunshine Connections

Partner Opportunities

- **Products**: hardware, infrastructure, telecommunications, software functionality, learning content providers, web part components, etc.

- **Services**: training and professional development, research, consulting, development services, etc.

Sunshine Connections

Partnership Protocol

- Partners conform to **SC compatibility criteria and requirements** to do business in Florida
- Partners participate in **general discovery** through "Request for Information" (RFI) process
- Partners contribute to **development** efforts
  - DOE, Microsoft or districts
  - "Intent to Negotiate" (ITN) process
  - State contracted services

Sunshine Connections

SC Presentation

- "**Public**" site provides information to all with computer, browser and Internet access (one-stop portal of resources).

- "**Restricted**" site provides data and information to authorized persons with appropriate username and password.

Sunshine Connections

Member Q&A

- Legislators can facilitate teacher and educator access to Sunshine Connections:
  - Support functional expansion efforts, including partnership opportunities that go through proper protocol.
  - Support technical infrastructure efforts to link local and state data systems.
  - Support teacher professional development and technology access activities and efforts.

- For more information visit:
  - www.fldoe.org/sunshine_connections for general information
  - www.SunshineConnections.org for the teacher site

HTML Viewer

Reports that are hosted by Microsoft® SQL Server™ Reporting Services can be viewed over a Web connection or in a Web-oriented format through HTML Viewer. HTML Viewer provides a framework for viewing reports in HTML. It includes a report toolbar, a parameter section, and a document map.

The report toolbar in HTML Viewer includes features you can use to work with your report, including export options so that you can view your report in formats other than HTML. The parameter section and document map appear only when you open reports that are configured to use parameters and a document map control.

The following table describes commonly used features of the report toolbar. Each feature is identified by the control that you use to access it. Advanced features are discussed later in this topic.

Use this icon or control	To
1 of 10	Open the first or last page of a report, scroll through a report page by page, and open a specific page in a report. To view a specific page, type the page number and press ENTER.
100%	Enlarge or reduce the size of the report page. In addition to percentage-based changes, you can choose **Page Width** to fit the horizontal length of a report page in the browser window, or **Whole Page** to fit the vertical length of a report in the browser window. A **Zoom** action is supported by Microsoft® Internet Explorer 5.5 and later.
bikes Find | Next	Search for content in the report by typing a word or phrase that you want to find (the maximum value length is 256 characters). The search is case-insensitive and begins at the page or section that is currently selected. Only visible content is included in a search operation. To search for subsequent occurrences of the same value, click **Next**.
Export: CSV (comma delimited)	Open a new browser window and display the report in the selected format. For more information about export formats, see the section below. To view the report in the selected format, click **Export**.
	Show or hide the document map pane in a report that includes a document map. A document map is a report navigation control similar to the navigation pane on a Web site. You can click on items in the document map to navigate directly to a specific group, page, or subreport. This feature is optional and appears only when a report author adds it to a report.
	Show or hide parameter value fields and the **View Report** button in a report that includes parameters.
	Refresh the report. Data for live reports will be refreshed. Cached reports will be retrieved from where they are stored.
	Open Help.

About Export Formats

From the report toolbar, you can choose to view your report in a variety of formats. The formats that are available are determined by the rendering extensions that are installed on the report server. When you choose another format, a second browser window is used to display the report, using a viewer associated with the export format you selected. If a viewer is not available for the format you select, you can choose a different format.

The following export formats are included in a default report server installation. The list of export formats available to you may vary from those listed here.

Export format	Description
Acrobat (PDF) file	View a report using a client-side PDF viewer. You must have Adobe Acrobat Reader to use this format.
HTML with Office Web Components	View the report using client-side Office Web Components to support charts or controls embedded in the report. You must have Office Web Components to use this format.
Excel	View the report in Microsoft Excel.
Web archive	View the report in an MHTML-encoded HTML format that
